15 Minutes to the Cloud

Presented by: Jack Baugh and Chuck Atkinson

DataAccess WORLDWIDE

Need a Complete WebApp Server Solution for Your DataFlex WebApps?

Your choices are...

The traditional way to setup a WebApp server...

- Research server configurations
- Research premise-based hosting locations, hosting requirements, Internet connectivity, etc...
- Buy, install, and configure, the server, O/S, WebApp Server, other software, server racks, Internet connection, etc...

The better way to setup a WebApp server...

- Setup an Amazon Web Services (AWS) account and SaaS-based software in a DataFlex Cloud environment!
- Select and configure an AWS instance
- Buy, upload, install and configure WebApp server and other web-hosting-related software

The fastest & easiest way to setup a WebApp server...

Buy a preconfigured **DataFlex Cloud Starter Kit** and be up and running **fast and easy!**

What is a DataFlex Cloud Starter Kit & what does it include?

- An Amazon-Web-Services (AWS)-hosted “T2.Medium” server and Amazon Machine Image (AMI) **preconfigured** with everything you need to run a DataFlex WebApp!
 - Microsoft Windows Server 2012 R2 with Internet Information Server (IIS) v8.5
 - 4GB of RAM; 50GB of Elastic Block Storage (disk space)
 - Microsoft SQL Server Express 2012
 - DataFlex WebApp Server with SQL Server Connectivity Kit (SaaS license for one WebApp)
 - 15GB of monthly outbound data transfer aggregated across all AWS services
 - 1GB of optional monthly AWS Regional Data Transfer

(Other AWS server and DataFlex software configurations are available.)
- Remote access to the AWS server via Microsoft’s Remote Desktop Connection and/or VPN
- Windows desktop shortcuts for:
 - Installing the current production release of DataFlex Studio*
 - Installing the developer version of DataFlex Reports*
 - Installing Chrome and Firefox web browsers
 - Accessing Amazon Web Service’s Support site
 - Accessing Data Access Worldwide’s cloud support forum

**60-Day evaluation version only or, BYOL - or purchase a SaaS license*

How long does it take to activate a DataFlex Cloud Starter Kit?

Just **four business hours** – or less!

What does DAW do to activate a DF Cloud Starter Kit?

- Finalize initial AWS/DataFlex Cloud configuration
- Process paperwork and your initial payment
- Setup your Amazon Web Services account
- Load the DataFlex Starter Kit AMI on your instance
- Test your instance
- Provide you with the info. needed to access your AWS instance

How much does a DataFlex Cloud Starter Kit cost?

The DataFlex Cloud Starter Kit is only \$145 per month, plus a one-time setup fee of \$145!

(U.S only, regional prices vary)

- Amazon also offers 1-year and 3-year AWS “Reserved Instances” for approx. 25-50% less than AWS’ “On Demand” (monthly) prices. Annual commitment(s) required.
- Additional AWS services are charged at Amazon’s then-current rates.
- Prices are based on recurring, monthly, non-perpetual, and non-transferrable “SaaS” DataFlex licenses.
- Prices subject to change without notice. Other terms and conditions apply.

What if I need DataFlex Cloud environment support?

- Amazon provides:
 - Basic Support (immediate access to web-based FAQs, free)
 - Developer Support (<12hr response, phone, chat, email, screen sharing \$49 mo)
 - Business Support (1hr response, formula-based cost)
 - Enterprise Support (15min. response, formula-based cost)
- DataFlex community support through the new DataFlex Cloud sub-forum on Support.Dataaccess.com
- Data Access Worldwide's Professional Services staff can also help you (standard rates apply)

DataFlex Cloud Starter Kit Activation Demonstration

Chuck Atkinson will now demonstrate activating the DataFlex Cloud Amazon Machine Image (AMI) within DAW's default DataFlex Cloud AWS instance

To order a DataFlex Cloud Starter Kit, contact:

Fern Bazerghi (U.S.)

800-451-FLEX or 305-238-0012

Fern.Bazhergi@dataaccess.com

If outside the U.S., contact your regional DAW Sales representative.

An electronic DataFlex Cloud Starter Kit Flyer will be included in your Synergy package.

Thank You
