The DataFlex Platform

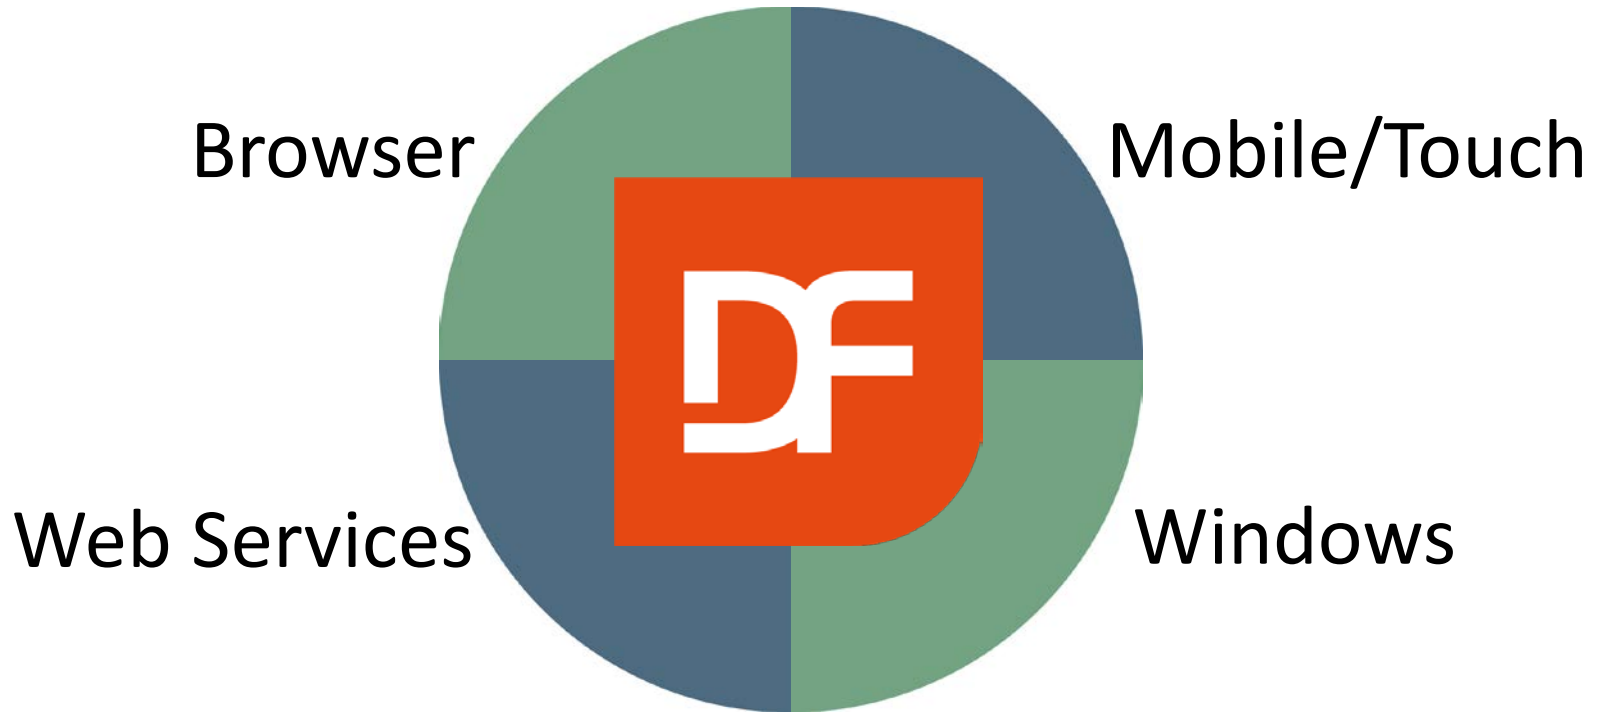

Presented by: Stephen W. Meeley

The Power of One...

One What?

- The DataFlex Core
 - One Language
 - One Framework
 - One DataBase API
 - One Data Dictionary Layer
- The DataFlex Tools
 - One Studio
 - One Debugger
- The DataFlex Platform is focused on building business applications efficiently...
 - Windows Applications
 - Desktop Web Applications
 - Mobile/Touch Web Applications
 - Web Services

DataFlex – Core and Frameworks

Designed to build business software faster and at lower cost

As you can clearly see...

- DataFlex is consistent
 - DataFlex is efficient
 - DataFlex is powerful
- ...without sacrificing access to industry leading technologies and expertise!

The DataFlex Platform

- The foundation from which you can
- Embrace and leverage the Cloud
- Access powerful servers and seamlessly embed SQL
- Integrate through Web services, both client and server, through SOAP and JSON interfaces
- Expand using controls and frameworks via COM and JavaScript
- Style using CSS

- When YOU decide to put them to work!

Thank you...
